

White 1687.

A New

ALMANACK

For the year of our Lord God

1687.

And the year from the Worlds

Creation, 5636.

Being the 3d from Bissextile, or Leap-year.

Calculated for the Meridian of *Todington* in *Bedfordshire*, where the North Pole is elevated above the Horizon 52. degrees and 8. minutes; and may serve for all parts of *England*, without any sensible error.

By Tho. White.

Celi enarrant gloriam Dei, & opera manuum ejus annuntiat firmamentum, Psal. 19. 1.

Cum Privilegio.

L O N D O N,

Printed by Bernard White for the Company of Stationers 1687.

A brief and necessary Computation of years.

	The Duke of <i>Albemarle</i> died.	17
	King <i>Charles</i> II died February 6. 1685.	2
	King <i>James</i> II was Crowned Apr. 23. 1685.	2

A Table to know when the Terms

begin and end, and the number of their Returns, with the day of the Month whereon they will be this present Year, 1687.

Hilary Term begins the 24. of January, and ends the 12. of February, and hath 4. Returns, <i>Viz.</i>	{	Offab. Hilary.	Jan. 20.
		Quind. Hilary.	Jan. 27.
		Craft. Pasf.	Feb. 3.
		Offab. Pasf.	Feb. 10.

Easter Term begins the 12. of April, and ends the 9. of May, and hath 5. Returns, <i>Viz.</i>	{	Quind. Pascha	April 11.
		Tres Pascha	April 18.
		Mens. Pascha	April 25.
		Quind. Pascha	May 2.
		Craft. Ascen.	May 6.

Trinity Term begins the 27. of May, and ends the 15. of June, and hath 4. Returns, <i>Viz.</i>	{	Craft. Trinit.	May 23.
		Offab. Trinit.	May 30.
		Quind. Trinit.	June 6.
		Tres Trinit.	June 13.

Michaelmas Term begins the 24. of October, and ends the 28. of November, and hath 6. Returns, <i>Viz.</i>	{	Tres Mich.	Octob. 20.
		Mens. Mich.	Octob. 27.
		Craft. Animar.	Nov. 3.
		Craft. Mart.	Nov. 12.
		Offab. Mart.	Nov. 19.
		Quind. Mart.	Nov. 26.

The Characters of the Seven Planets.

♄ Saturn, ♃ Jupiter, ♂ Mars, ☉ Sol, ♀ Venus, ☿ Mer-
cury, ☾ Luna, ☊ Dragons head, ☉ Dragons tail.

The Characters of the Five Aspects.

- ♌ Conjunction, in the same Sign and degree.
- * Sextile, when Planets are distant 60 deg. or 2 Signs.
- ☐ Quartile, when distant 90 deg. or 3 Signs.
- △ Trine, when they are distant 120 deg. or 4 Signs.
- ♌ Opposition, when distant 180 deg. or 6 Signs.

Of the Eclipses this Year, 1687.

IN this year there will be but two Eclipses, and both of the Sun. The one of them happens before the Sun's Apogæon, and the other after it, and both of them almost Central; so that there can be no full Moon Eclipse in this year.

The first Eclipse of the Sun will be on the first day of *May* a little afternoon, in twenty one degrees of *Taurus*, among the *Pleiades*, a turbulent Constellation. It is within a degree of the North Node, and Visible.

The second will be on *October* the twenty sixth day, about six of the Clock in the Morning: It happens in thirteen degrees of *Scorpio*, near the Stars of the *Balance*. This will be a great Eclipse, but not perceptible to us, it being almost over before the Sun rises to us in *England*.

This year *Venus* is our *Phosphorus*, or morning Star, until the twenty fourth day of *January*; at which time having made her Conjunction with the Sun, she becomes our *Hesperus*, or Evening Star, and so continues until the Eighth day of *November*, and afterwards to the years end is *Oriental*, or our Morning Star again.

THat most approved Cure of the *FISTULA*, Pains, ulcers, Piles, Hemorrhoids, from any Evil or Disease, by application of a few drops, some having been cured at once dressing, as many can testify, when all their means failed: and the French Disease, without hindrance of Business, or Mercurial Medicines, shewing what danger they are in, and time for Cure: By *John Archer*, one of His Majesty's sworn Physicians; who is to be spoken with in his Chamber, at the Sadlers against the Mews by *Charing-Cross*, next door to the black Horse. His hours are from 12 to 5 in the Evening; at other times at his House at *Knights-bridge*, where he hath a large House in a good Air for Melancholly, Consumptive, or Distracted Persons; who are cured with the greatest Care and Speed.

January hath xxxi days

New Moon the 3 day 53 m. past 7 at night.
 First Quarter the 10 day 22 m. past noon.
 Full Moon the 18. day 25 minutes past noon.
 Last Quarter the 26. day 36 m. past 1 in the afternoon.

TO Measure Timber and Board, the ordinary Way now used amongst Carpenters in the Country, is by the Line of Numbers, commonly called *Gunter's Line*.

Board-Measure.

As 12 is to the breadth in Inches ; so the length in Feet to the content in Feet.

Squared Timber 14 Inches on both sides, or any other equal Square;

As 12 Inches is to 14 Inches the breadth or side : so the length in Feet, to a fourth Number ; and that fourth Number extended to the content in Feet.

A Square 14 Inches one side, and 9 Inches the other side, or any unequal Squared Timber.

As 12 Inches is to 9 Inches the breadth : so the depth 14 Inches to a fourth Number.

As 12 to this fourth Number, so the length in Feet to the content in Feet.

Round Timber.

As 42. 54, (the Circumference in Inches that makes 1 Foot long, a Foot.) Is to the Circumference in Inches. So the length in Feet, to a fourth Number. And that fourth to the content in Feet being extended.

But the usual way with Carpenters is to girt it about the middle, and take a fourth part thereof for the Square, and then measure it as Squared Timber by the Line. Note, that if the Compasses come off the Line, they must be set at the same point on the Line at the other end of the Ruler : and always keep them forward the same way, according to the Proposition.

Kind Reader:

I Here direct thee a plain and easie way to make the Cieling-Dial, by help of an Horizontal-Dial, at two Operations: But I could describe two several ways to make the Cieling-Dial; one by the Sines and Tangents on the Sector, the other way by placing the Natural Tangent of each Hour on the Equinoctial-line found on the Cieling: And by the Complement of each Hours Arch from the Meridian, the Hour-lines are drawn, pointing to the Center without the Room. But considering these ways might seem to a new Practitioner an *Herculean* task, therefore this easie way I have contrived.

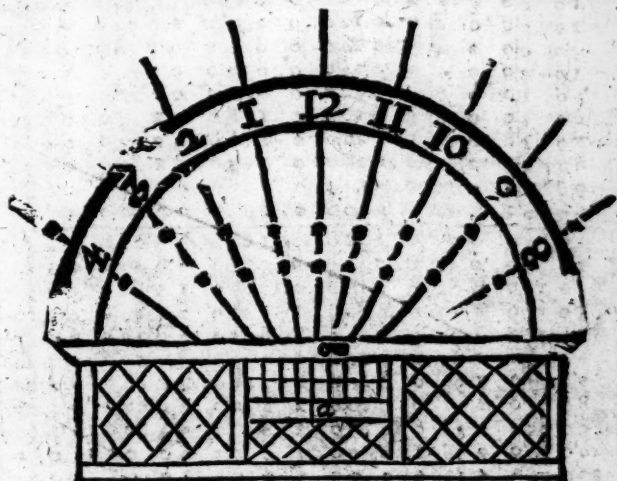

First, Provide a piece of Looking-glass made round, about the bigness of a Groat, and scrape or rub off the Silver, and then it will cast but one shadow on the Cieling; then cut a round place in the Gerdin of your Window, or in some piece of Wood fastned close to the Glass-window, about sixteen or eighteen Inches from the Cieling, in which lay your Glass, with some soft Wax at the bottom thereof, that you may crush the Glass which way you please; and be sure to place it level with the Horizon, which is the principal work to be done carefully. The Glass thus fixed, provide a true Horizontal-Dial, made for the Latitude wherein you live, and place it exactly by some other Dial in your Window, and mark the place in case it be removed; or if it be fixed on a Post near thereto, it will serve. Then as each Hour goeth in your Horizontal-Dial, mark the Hours with a small black spot upon the Cieling, in the midst of the place where the Glass casteth the reflection of the Sun upon the Cieling; do so as long as the Sun doth shine upon the Cieling. If you cannot mark all the Hours in one Day, mark the rest of the Hours as soon as you can. Then about a Month after this Observation, or when you see the Sun removed on the Cieling, about a foot or more, make another Observation of Hours on the Cieling, as you did before. Then with a Packthread and a Coal rubbed thereon, may two move their hands upon the Cieling to and fro, until the Line lieth directly over two of those spots, marked for each Hour; then may you strike the Line on the Cieling, which will represent and be the true Hour-line, according to your Horizontal Dial, though the Window Decline from the South. But for further Instruction, behold the Figure.

A. the Glass. B. the upper Sile or Transum of the Window and Perpendicular to A. The little spots in the Hour-lines, signifie the first and second Observations, observed from the Horizontal-Dial, by which the Hour-lines are drawn, pointing to the Center in the Air without the Room. The Hours of Seven in the Morning, and Five at Night, will be done fall upon the Cieling, except the Window Decline from the South; which if it do, your work must be after the same manner as I have before declared.

Note,

White. 1687.

Note, that the round piece of Looking-glass must be laid level, close to a clear square pane of glass within the Room.

ADVERTISEMENT.

Ruptures or Broken Bellies.

Present help for Men, Women or Children, by a Traveller famous in *Germany* and other Countries for his practice this 25 years; and maketh all sorts of Trusses easie, none such made in *England*, as these be found by experience. He helps those at a distance, as well with directions, as those in *London*, & helps those that cannot hold their Water or bear down in their Privy parts, & maketh strait Stokins. The Poor have advice for nothing. Take it in time. By *R. Collins*. From 9 to 12 at the Bell & Naked Boy on the Ditch-side at Fleet-bridge: The Afternoon, at the Bell in *S. John's Court* in *Clerkenwel* Parish.

Those highly approved, and only true Spirits of Scurvy-Grass, both plain and Golden, famous for their Admirable Cures to the Scurvy, Dropsie, and several other General Distempers are exactly and faithfully Prepar'd, and Sold by the first Author *Robert Bateman*, at his House in *Paul's Chain*, near *Doctors Commons*, *London*, with printed Directions for their use. The Bottles are Sealed with his Coat of Arms, the Half-Moon and Ermins, to prevent Counterfeits: Price one Shilling each Bottle. These are the True Spirits, notwithstanding all the late Pretenders thereunto, therefore let all persons beware they are not cheated with upstarts.

A Table of Interest at Six per Cent.

THIS Table shews the Interest of any sum of Money from 1 s. to 100 l. from a day to a year. And by the help of Addition you may compute the Interest of any sum whatsoever. And note, that for the greater exactness the penny is divided into 100 parts; so that 25 parts are a farthing, and 50 parts a half-penny, and 75 parts 3 farthings, &c.

Example:

The Interest of 100 l. for six months one week and one day, is thus found by the Table.

$$\begin{array}{l}
 \text{Interest of 100 l. } \left\{ \begin{array}{l} \text{for 6 mon. } 03-0-0-00 \\ \text{for 1 week, } 00-2-3-61 \\ \text{for 1 day, } 00-0-3-94 \end{array} \right\} \text{ viz. } 3-2-7 \text{ half-pen.} \\
 \text{03-2-7-55}
 \end{array}$$

An Alphabetical Catalogue of all the Shires, Cities, Market-Towns, Castles, Parishes, Rivers, and Parks, in every particular Shire in England and Wales; with the distance of Miles, and Points of the Compass from London.

White. 1687.

The Explanation and Use OF THE MAP and TABLE.

First for the Map: The Figures in each Shire of the Map, are to shew you the names of every County, and the Letters in the same are for such uses as I will shew hereunder.

You must understand, that London is in Middlesex, which County of Middlesex hath the figures of 22 in it, and the little black speck or spot therein, signifieth London. Now if you would readily finde the name of any Shire therein, and how many miles the middle of the said County (in a straight line) is from London, and what point of the Compass it lieth from the said City, resort then to the Table of Shires on the other side, and it will resolve you.

As for Example :

Yorkshire it hath the figures of 39 in the Map, and so it hath likewise in the Table: where is shewed that the middle or heart of that Shire is 145 Miles from London in a straight line, and it lieth North from the City; and looking forward toward the right hand, it sheweth it hath one City, Forty Market Towns, Fourteen Castles, Four hundred fifty nine Parishes, Thirty six Rivers, and Seventy two Parks; and so of the rest.

The use of the Letters in the Map, is this:

Scotl. signifieth part of Scotland, I part of Ireland, F part of France, M the Isle of Man, W the Isle of Wight, L the Lizard-point, H Holy-head, the * the Irish-Sea, B the British or English-Sea, G the German-Sea, Ba Barwick, D Dover, N Newcastle, C the Points of Compass, S the Scale of Miles by which you may measure the distance of any place: for every black degree is five miles, so is every white.

The 39 Shires from Berkshire to Yorkshire are the English Shires, and the other 13 from Anglesey to Radnorshire are Welsh.

It may be something farther in Miles to the middle of each Shire, by reason of the crookedness of the high-ways, Rills, and Vallies; but what is here set down is meant in a straight line from London.

A Geographical Epitome of the M A P
of *England and Wales* ; wherⁱⁿ is shewed how
each Shire is bounded and joyned to each other. and
what Point of the Compass every County lieth from the Ho-
nourable City of *London* : (being lately published) the
use of which is explained in the foregoing Page.

B 4

England

England containeth 29568000 Acres.

Scotland containeth 14432000 Acres.

Ireland containeth 18000000 of Acres.

The 17 Provinces of the *Low Countries* contain in the whole, 10791000 Acres; whereof those under Spain, 9197000 Acres.

Those United under the States, 3599000 Acres.

France in its 32 Provinces containeth 82879000 Acres.

The Explanation of the following Table.

First, get a Chain or Cord of two perches in length, and divide each perch into 10 equal parts, which I call links, each of those parts will contain 19 inches and 8 parts of one inch: the inch divided into 16 parts, 10 of those links makes 16 feet and an half, our common perch statute-measure: 100 square links makes one perch of land, 40 square perches make one rod, 80 half an acre, 120 three rods, and 160 square perches one acre.

This following Table doth contain 5 Columns: The first Column on the left hand sheweth the length of the Acre in perches and half perches; the figure of 5 under every length, signifieth 5 links, or half a perch forward: The other four Columns shew the breadth for one Acre; the first Perches, the second Links, the third Inches, the fourth Parts of one inch, the inch divided into 10 parts.

And also in this last Column in many places of this Table, you will see a small Figure placed on the right hand of p, which is no more than one 10th part of an inch divided into 4 parts; and the true or neereſt part I have observed.

Example: At 13 perches in length, the breadth will be found 12 perches, 3 links, 1 inch, and 5 parts of an inch, and 1 part of a fourth; which is a quarter of a tenth part. At 13 perches and an half in length, which is expressed by the figure of 5 under 13, you will finde the breadth 11 perches, 8 links, 10 inches, 2 parts and 3 quarters.

A Table to set forth Acres :

Declaring the breadth for one Acre
for any length given in Perches, or in Half
Perches, from 10 to 80.

Exactly Calculated, by *Thomas White*, Surveyour.

Of the Fairs

In ENGLAND and WALES;

Revised, Corrected, and Enlarged.

Fairs in January.

The 3 day at Llanthitber. 5 at Bickertford in Lancashire. 6 at Salisbury, Wiltol. 7 at Llangtyny. 13 at Derby. 25 at Loughton-buzzard, Wiltol, Churchingford, Northallerton in Northshire, Gravelend. 31 at Llandisfel.

Fairs in February.

The 1 day at Bromly in Lancashire. 2 at Abboyn, Bath, Bicklesborth, Bughborth, Farrington, Godlemebb, Lyn, Paldston, Reading, Becklesfield, the Wizes in Wiltshire, Whitland. 3 at Borgegrove, Wymley. 6 at Stafford for six days with all kind of merchandise without arrest. 8 at Tragaron. 9 at Landaff. 14 at Obbule in Northamptonshire, Febertham. 24 at Baldoch, Bourn, From, Buckingham, Henly upon Thames, Pigham-Ferries, Lebbesbury, Wpplingham, Walden. 26 at Stanford an poze-fair. 28 at Chesterfield.

Fairs in March.

The 1 day at Langadog, Llangebellah, at Padym. 3 at Wymbel-brakes in Northshire. 4 at Wckham. 8 at Tragaron. 12 at Stropford, Stamford, Sudbury, Woburn, Wrexham, Wodnam, Alfame in Northshire. 13 at Wye, Wodekin

White. 1687.

Bodmin in Cornwall, Mountholm. 17 at Parrington. 18 at Sturbridge, 20 at Alesbury, Durham 24 at Lanerchemith. 25 at Saint Albans, Ashwel in Hertfordshire. Burton, Cardigan, Cartwolden in Essex, Huntingdon, Ickwell-green, Saint Jones in Worcestershire, Malden, Malpas, Newcastle, Northampton, Oney in Buckinghamshire, Woodstock, Whitland, Great-Chart. 31 at Malmesbury.

Fairs in April.

The 2 at Hitchin, Northstreat, Rochford, 3 at Lick in Staffordshire. 5 at Wallingford. 7 at Derby. 8 at Fenny-stratford. 9 at Billingsworth. 11 at Newport-Pagnel. 22 at Stratford. 23 at Amphill, at Bedford, Bruton, Wykestock, Wilton, Wury in Lancashire, Castlecombs, Charing, Chichester Engfield in Sussex, Gilsford, Bishops-Batfield, Buntingham, Apwotch, Bilbrough, Lonsquer, Northampton, Ruxley in Sussex, Saint Pombs, Satebridge-worth, Lambworth, Wilton, Wortham. Wilsborough, Warbin in Norfolk, Sapler in Hertfordshire. 25 at Abingdon, Bourn in Lincolnshire, Buckingham, Caine in Wiltshire, Clif in Sussex, Colebrook, Luton in Bedfordshire, Dunmow in Essex, Darby, Abingo in Buckinghamshire, Deekham, Wrorester, Winchcomb, Clare. 26 at Lenderden in Kent, Weberly.

Fairs in May.

The 1 day at Andover, Blackburn in Lancashire, Bickhill, Billo in Bedfordshire, Chelmsford. Congerton in Cheshire, Folkingham, Gigg-hoel, Kimar, Leighdon, Leicester, Litchfield, Lexfield in Suffolk, Linfield, Mattrist, nt, Louth, Spaldstone, Ouseley in Shropshire, Perth, Pbl-
lps.

White. 1687.
